

Size guide

Do you not know your ring size?
This is how you measure it.

1. Take a ring you – or the person you want to give a present to – already wear and place it on the template.
2. Move the ring from circle to circle until you find the one that corresponds exactly with the interior circumference of your ring. If you hesitate between two sizes, always choose the bigger one.
3. The code in the circle indicates the circumference of your finger.

These measurements are just a guideline: every ring can be fitted perfectly in the shop.

Attention: this template has to be true to scale: the line here should measure 15 centimetres.
